Subject: SETTLEMENT

I hope it is not too late but I feel the settlement does not go far enough and is too hard to control.

Microsoft is trying to settle the Private Suit against them by giving Windows computers to under-privileged people - which only gets Windows software into more places and is little more than advertising - not a penalty.

After Microsofts actions during the Anti-Trust trial I think most people can see what lengths MS will go to in trying to protect the cash machine they have built.
